WEATHER OF CONCERN

NORTHERN CALIFORNIA

- The Sierra Avalanche Center in Truckee has Issued a backcountry Avalanche Warning in effect through Friday 0700 hours for Central Sierra Nevada Mountains between Yuba Pass (Hwy. 49) on the north and Ebbetts pass (Hwy. 4) on the south, including the greater Lake Tahoe area.
- A cold front will bring widespread rainfall through today as it moves from north to south across the San Francisco Bay Area and Central Coast.
- A Winter Storm moves through the area into early Friday bringing periods of rain, snow, and gusty winds to the area.
- Unsettled weather continues over the weekend into next week.
- A Winter Storm Warning is in effect for the Southern Sierra Nevada above 4,000 feet from this morning until early Friday morning.
 - Severe winter weather conditions will make travel exceptionally hazardous or impossible.
 - The majority of this snow will fall this afternoon and evening.
 - Winds will gust as high as 65 mph on exposed ridgetops and near the crest.

SOUTHERN CALIFORNIA

- A Pacific storm system will bring moderate rain, mountain snow and breezy conditions to the area tonight. Light northeast winds with warmer, dry conditions are anticipated for Friday and the weekend.
- For the first half of next week, cooler conditions are expected with the possibility of some light showers.

WEATHER KEY POINTS

01/16/20 - 01/22/20

Thursday

- A strong storm system will move across primarily central and northern CA through Thursday night
 - Heavy snow and strong winds over the mountains of Inland and Coastal Regions will cause major travel impacts
 - Snow levels generally around 2000-3000 feet in northern California and 3000-4000 feet in central California
 - Sierra - Snow amounts 1 to 2 feet, with localized amounts up to 3 feet
 - Other Inland and Coastal Region Mountains- Snow amounts 6 to 12 inches, with localized amounts up to 2 feet
 - Periods of heavy rainfall are possible in the lower elevations
 - Rises are expected in small creeks and streams, but no main stem river flooding is expected
 - Minor impacts are possible on the Ferguson burn scar
 - Rain and snow will also impact portions of Southern Region Thursday
 - The heaviest snow accumulation in Southern Region is expected above 5000 feet, but snow levels could drop down to 3500 feet behind the cold front, with the possibility of impacts at some passes including the Grapevine
 - Strong winds will begin near the Oregon border through today, with tree damage and power outages possible, particularly in Modoc and Siskiyou counties
 - Somewhat weaker but still gusty winds will also continue across portions of Inland and Southern Region today, with damage to tree limbs and travel impacts possible
 - Thunderstorms are possible in Coastal Region, and could produce small hail and brief heavy rain

Friday-Sunday

- Some snow showers may cause some lingering travel impacts over the mountains of Inland Region on Friday, but otherwise Friday should be dry across much of the state
- A storm Saturday will bring rain to far northeast California, with no significant impacts currently expected
 - Otherwise, dry conditions should prevail across the rest of the state through the weekend

Monday-Wednesday

- The next storm system is expected to move into the state Monday and Tuesday, with the heaviest precipitation across Coastal and Inland Region
 - Travel impacts due to snow in the mountains are possible, primarily in Inland Region
